SUMMARY

Backend Engineer specializing in **Java** and **Spring Boot** development with **1.5+ years of experience** building **REST APIs**, **microservices**, and transactional backend applications. Experienced with **PostgreSQL**, **Redis**, **Apache Kafka**, **Docker**, and **Spring Security**. Worked on authentication systems, **asynchronous event-driven** workflows, inter-service communication, API integrations, and distributed backend services. Focused on scalable backend development, clean system design, and reliable service architecture.

EXPERIENCE

Backend Developer - Zardan Systems

October 2025 – May 2026

- Developed and documented backend services for a credit processing platform using **Java**, **Spring Boot**, **Swagger/OpenAPI**, **PostgreSQL**, **Redis**, **Apache Kafka**, and **Docker**.
- Built Kafka-based **asynchronous** workflows for communication between orchestration services, monitoring systems, and external integrations.
- Implemented **idempotent** processing logic to reduce duplicate transactional operations and improve **consistency** between distributed services.
- Developed integration services for external data providers and internal **orchestration systems**.
- Implemented secure service-to-service authentication and communication using **Spring Security** and **mTLS**.
- Built internal mock and testing services to improve integration testing reliability and external system simulation.
- Participated in API design, backend architecture discussions, workflow debugging, and microservice integration **troubleshooting**.

Software Developer - Belfast Met & FIT (sponsored by Bank of America)

July 2025 - October 2025

- Completed an intensive software engineering programme focused on **Java**, **Spring Boot**, **SQL**, relational databases, and REST API development.
- Built backend applications using Java, Spring Boot, JPA/Hibernate, and PostgreSQL.
- Awarded **First Distinction** for backend engineering and database development performance.

Backend Developer - NetLS

August 2024 - June 2025

- Developed backend services and **REST APIs** for loan application, approval, payment, and transactional workflows using **Java** and **Spring Boot**.
- Implemented authentication and authorization systems using **Spring Security**, **JWT**, **RBAC**, and refresh token workflows.
- Built **PostgreSQL** persistence layers using **JPA/Hibernate**, native **SQL** queries, and optimized database access patterns for transactional operations.
- Implemented Kafka-based asynchronous processing and **Redis** caching for backend workflows and inter-service communication.
- Containerized backend services using **Docker** and configured multi-service development environments with Docker Compose to improve local development consistency.
- Wrote unit and integration tests using **JUnit** and **Testcontainers** to improve backend reliability and testing reproducibility.
- Contributed to API design, backend architecture discussions, transaction handling, and microservice communication.

SKILLS

Backend: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, SQL, PostgreSQL, MySQL, Redis, Apache Kafka

Architecture & Systems: Microservices, Distributed Systems, Event-Driven Architecture, Asynchronous Processing, Transaction Management

Testing: JUnit, Testcontainers, Integration Testing

Authentication & Security: JWT Authentication, RBAC, mTLS

DevOps & Tools: Docker, Docker Compose, GitHub Actions, CI/CD, Git, Linux, Swagger/OpenAPI

EDUCATION

BEng Software Engineering - Queen's University Belfast

CERTIFICATIONS

- SQL Certification** - Belfast Digital Skills Academy (2025)
- AWS Cloud Practitioner Essentials Training** - AWS Skill Builder (2026)

LANGUAGES

English - Upper-Intermediate (IELTS Academic 6.0, 2025) **Ukrainian** - Native
