SUMMARY

Junior Java Backend Developer and Software Engineering student with commercial experience building backend services using Java and Spring Boot. Hands-on experience with REST APIs, SQL persistence, Kafka messaging, security, Docker.

EXPERIENCE

Backend Developer — Zardan Systems

October 2025 – Present

- Built event-driven backend components consuming Kafka messages for asynchronous integration with external database systems.
- Implemented idempotent Kafka consumers with schema validation, enabling safe retries and data consistency across services.
- Developed secure service-to-service communication using mutual TLS (mTLS) within internal backend systems.
- Designed backend services and mock REST APIs to emulate third-party integrations and support reliable integration testing.
- Containerized backend services with Docker and Docker Compose to standardize local development and integration environments.

Software Development Trainee — Belfast Met & FIT (Bank of America)

July 2025 – October 2025

- Completed industry-led software development programme covering Python, SQL, relational data modeling, and backend fundamentals.
- Built basic REST-style backend components and worked with SQL queries through hands-on labs and assessments.

Mathematics Tutor / Academic Curator — StudentUA

August 2024 – July 2025

- Delivered individual and group mathematics tutoring, developing clear explanations for complex concepts.

PROJECTS

LoanCompany — Spring Boot Backend Platform

- Built REST APIs for loan application, approval, and payment workflows using Spring Boot.
- Implemented role-based access control with Spring Security and JWT authentication.
- Integrated PostgreSQL (JPA/Hibernate) for transactional persistence and Kafka + Redis for event-driven processing and caching.

NestJS REST API — Learning Project

- Developed REST APIs with JWT-based authentication and role-based authorization.
- Implemented validated CRUD endpoints using DTOs and TypeORM.
- Applied dependency injection and modular backend architecture principles.

SKILLS

Core: Java, Spring Boot, REST APIs, JPA/Hibernate

Data: PostgreSQL, Redis

Messaging: Apache Kafka

DevOps: Docker, Docker Compose

EDUCATION

BEng Software Engineering — Queen's University Belfast

2025 – Present

Previously completed Year 1 of Software Engineering at Igor Sikorsky Kyiv Polytechnic Institute (2024 – 2025) and transferred to QUB (covered algorithms, Java, C/C++, networks, computer systems).

CERTIFICATIONS

- SQL Certification — Belfast Digital Skills Academy (2025)
- IELTS Academic — CEFR B2 (2025)

LANGUAGES

- English — B2 (Upper Intermediate)
- Ukrainian — C2 (Proficient)
- Russian — C2 (Proficient)
